### WXP 120 Set

Bestellnummer : T0052920299

#### Soldering set with holder WDH 10

The WXP 120 soldering iron is characterised by fast and precise achievement of the soldering tip temperature. A highly powerful 120 W heater element provides excellent dynamic performance. Thanks to its slim-line design and the extremely short distance from the handle to the tip, this soldering iron can be used for general purposes from precision soldering to high-temperature soldering. The WXP 120 is equipped with a usage detector and can be automatically switched to standby mode or switched off when not in use. The operating status is indicated by the status indicator LED. For directions for setting the standby temperature and the switching times, please refer to the operating instructions of the WX supply unit in use.

#### Technical Data

<b>Temperatur range</b>	100 °C - 450 °C (212 °F - 850 °F)
<b>Tool cable</b>	Silicone rubber, heat resistant
<b>Heating element</b>	Integrated heating wire element
<b>Temperature sensor</b>	Platinum sensor
<b>Heating output</b>	120 W
<b>Voltage (heater)</b>	24 V
<b>Heat-up time</b>	(approx.) 14s (50 °C to 380 °C) (120 °F to 660 °F)
<b>Connection</b>	6 pin connector, polarity protected with lock
<b>Weight</b>	42 g incl. cordless tip
<b>Tip type</b>	XT series
<b>Supply unit</b>	Weller WX Stations

Note: The WXP 120 soldering iron by Weller may only be operated together with Weller WX supply units.
